Quick Assistance for Pelvis and Lower Extremity Fractures

The newly developed CHAMP is the **perfect device** for the immobilisation and traction of the Hip and lower extremity Fractures.

In an upcoming situation the CHAMP applies immobilisation and traction to the affected limb, re-aligning the fracture and thus, avoiding unnecessary pain and internal bleeding during the evacuation to the hospital.

The CHAMP can be used independently as a PELVIC SLING or in combination as a TRACTION DEVICE.

The CHAMP is part of the standard Type B + C equipment of any ambulance according to the European standard EN1789.

Application examples:

- Serious traffic accidents
- Sports accidents
- Work accidents
- Accidental falls in a domestic environment
- Military use

The ADVANTAGES of the CHAMP

- Applicable to patients with a minimum height of 150 cm onwards
- Flexible and adjustable to both legs
- Suitable for CT, and X-Ray
- Reusable and very durable
- Impermeable material
- Easy to clean and to disinfect
